

Minnesota Pollution Control Agency

October 31, 1985

Mr. Dennis Thorson
Safety Engineer
Aligned Fiber Composites
Highway 52 South
Chatfield, Minnesota 55923

Dear Mr. Thorson:

Re: Return to Compliance

After reviewing your most recent submittals concerning hazardous waste management (personnel training records and contingency plans), I find that your company is now in full compliance with Minnesota's hazardous waste rules (ch. 7045 [1984]). This compliance follows an initial inspection on January 23, 1985 and a follow-up inspection on July 18, 1985.

This return to compliance was accomplished by the construction of a spill containment system for your storage trailer, construction of a shed equipped with a telephone and safety equipment, and the timely submittal of all required documents and records. The Minnesota Pollution Control Agency (MPCA) appreciates these efforts and commends you on a job well done.

As we discussed over the phone on October 2, notification forms for the two underground tanks used for styrene storage will be sent to you by Tom Clark of the MPCA. Questions concerning underground storage can be addressed to Mr. Clark at 612/296-7335. Please feel free to give me a call anytime at 612/296-7266 with any other questions you may have concerning hazardous waste management. Again, thank you for your company's efforts.

Sincerely,

Bill Thompson
